Test	Result
Collision with walls	The player collides with the walls and then stops
Collision with obstacles	The player stops when it hits an obstacle (the next cell is an obstacle)
An unassigned key is pressed	Nothing happens when it is pressed
Collision with the goal causes a message saying “You win” in the terminal	The message appears and then the game loop ends shortly after (as intended)
Does it open when clicking the executable file	Clicking the executable file loads the game
